Dynamic Symmetry Armature plus Fibonacci Spiral with eye at the upper right. Another “PHI”, near-Golden, painting, with two obvious focal points at the intersections of the main diagonals with their reciprocals. The diagonals seem to parallel the main path leading back to the mountains and the light curve crossing it up to the right cliff focal point. We see the repeated motif of the shadows and light forms paralleling the diagonal from the lower left up to the right.

Note the near-PHI aspect ratio:  $19/12=1.5833\dots$
